

MIRTHAVARSHINE RP

Software Engineer | Generative AI & Prompt Engineer

+91 81480 85973 | Coimbatore, TN | mirthavarshine024@gmail.com | [LinkedIn](#) | [GitHub](#) | Immediate Joiner

PROFESSIONAL SUMMARY

Entry-level Prompt Engineering enthusiast with a background in software development, API integration, and quality assurance. Familiar with prompt design, prompt refinement, zero-shot and few-shot prompting, structured outputs, and AI response evaluation. Hands-on experience using AI tools for code understanding, debugging, and problem-solving. Knowledge of Python fundamentals, REST APIs, JSON, and software testing. Seeking an entry-level Prompt Engineer or Generative AI role to apply technical skills, develop practical AI solutions, and contribute to improving AI-generated outputs.

TECHNICAL SKILLS

Prompt Engineering: Prompt Design, Prompt Optimization, Zero-shot Prompting, Few-shot Prompting, Prompt Refinement, Structured Outputs (JSON), Context Management

Generative AI: LLM Fundamentals, Generative AI Concepts, AI Response Evaluation, Hallucination Awareness, Responsible AI

AI Tools & Productivity: ChatGPT, Claude, Cursor AI, Gemini, AI-Assisted Code Generation, Prompt-Based Debugging

Programming & APIs: Python (Basic), JavaScript, Java, Dart, REST APIs, JSON, HTTP/HTTPS, Postman, Dio

Development & Testing: Flutter, React, Manual Testing, Functional Testing, Regression Testing, API Testing, Bug Reporting, Root-Cause Analysis

Tools & Methodologies: Git, GitHub, VS Code, Zoho Projects, SDLC, STLC, Agile/Scrum, Clean Architecture

PROFESSIONAL EXPERIENCE

Software Engineer | *Tart Labs, Coimbatore, TN*

Sep 2025 – Present

- Apply prompt engineering fundamentals to create clear instructions and generate relevant, structured AI responses for development-related tasks.
- Refine prompts to improve response accuracy, clarity, and adherence to specific technical requirements.
- Experiment with different prompting approaches to support code explanation, error analysis, and code refinement.
- Evaluate AI-generated outputs for relevance, correctness, and alignment with expected requirements.

- Use prompt engineering techniques to generate code explanations, troubleshoot errors, and assist with technical problem-solving.
- Design and refine prompts by providing clear instructions, relevant context, and expected outputs to improve AI-generated responses.
- Develop task-specific prompts to support software testing, debugging, and application development workflows.
- Apply structured prompting techniques to analyze technical requirements and generate step-by-step solutions.
- Work with Flutter, Dart, REST APIs, and application data flows during development and maintenance.
- Constructed zero-shot and few-shot prompt templates to automate synthetic data generation and optimize LLM-driven test case creation.

PROJECTS

AI Prompt Evaluation & Structured Response Testing | *Prompt Engineering, LLMs, Python, JSON*

- Designed and refined prompts for generating structured responses across different task scenarios.
- Evaluated AI-generated responses for relevance, consistency, instruction adherence, and formatting accuracy.
- Experimented with zero-shot and few-shot prompting techniques to improve response quality.
- Documented prompt variations and compared outputs to identify opportunities for prompt refinement.

Flutter API Integration & Architecture Application | *Flutter, Dart, Dio, REST API, BLOC/Cubit*

- Developed API integration workflows using Dio and repository-based architecture for application data handling.
- Implemented API error handling and response processing for reliable application behavior.
- Applied structured debugging and testing approaches to validate API interactions and application functionality.

EDUCATION

B.E. Computer Science and Engineering | *CGPA: 7.87/10*

June 2022 – Mar 2026

Jansons Institute of Technology, Coimbatore, Tamil Nadu
